How Effective Is Education on Inhaler Use?

The Best of RESPIRATORY CARE eBooks

The Best of RESPIRATORY CARE eBooks are manuscripts previously published and now available in electronic format for quick and easy reference.

Respiratory Physiology in Critically Ill Patients $2.99
Covers the basics in respiratory physiology in the mechanically ventilated, critically ill patient and the nuances of oxygenation, ventilation, lung mechanics, respiratory physiology and cardiopulmonary interactions.

The Scientific Basis for Respiratory Care $2.99
Evidence-based medicine (EBM) is the integration of individual clinical expertise with the best available research evidence from systematic research and the patient’s values and expectations. Although all tenets of EBM are not universally accepted, the principles of EBM provide a valuable approach to respiratory care practice.

Best of Airway Management – Tracheostomy $4.99
It is important for clinicians to appreciate the nuances of care for patients with a tracheostomy. They must know when a tracheostomy is indicated, how to select the proper device, how to adequately humidify the inspired gas, how to manage the wound, and how to recognize when the tube can be removed (decannulation).

2014 Best of Aerosol Therapy $4.99
Management of acute and chronic respiratory conditions with inhaled medications are a cornerstone of the profession of respiratory care. This eBook contains the Top 7 must-read manuscript selections from 2014 in the clinical area of aerosol therapy.

Management of the artificial airway is a core skill of the respiratory therapist. Securing the tube and cleaning the airway are time-honored techniques that have new device options. The implementation of the AARC CPG has been shown to reduce complications and choice of suction catheter size remains critical.

Best of Airway Management – Clinical 2015 $4.99
The implementation of the AARC CPG has been shown to reduce complications and choice of suction catheter size remains important. Biofilm accumulation on the artificial airway is a key step in the development of pneumonia and prevention or removal is a new area of interest.

See the eBooks category in the AARC store for a full list of eBooks currently available
