Coming in May

EDITOR’S CHOICE
Noninvasive Oxygenation Strategies for Acute Hypoxemic Respiratory Failure in COVID-19

ORIGINAL RESEARCH
Resilience and Burnout Resources in Respiratory Care Departments
Prone Positioning in Spontaneously Breathing Mechanically Ventilated Subjects With ARDS
Predicting SBT Failure or Difficult/Prolonged Weaning
Hospital Readmissions and Mortality of Mechanically Ventilated Adults With Pneumonia
Regional Ventilation in a Simulated BPD Lung Model
Titration of Parameters in Shared Ventilation With a Portable Ventilator
5-Repetition STS as an Outcome Measure for Pulmonary Rehab in Asthma
Daytime vs Nighttime Extubation in the PICU
Open and Closed Endotracheal Suction and Pulmonary Function
Prediction of Apnea Testing Duration During Brain Death Assessment
Short-Acting Sedatives/Analgesics Protect Against VAEs in Children
High-Flow O₂ in Tracheostomized Subjects With PMV
Mortality in Elderly vs Very Elderly Mechanically Ventilated Subjects
Twice Daily Huddles Improve Collaborative Problem Solving
Inadequate Functioning of Nebulizer Compressors Used by Individuals With CF
Standardized Refractory Hypoxemia Guideline for Subjects Receiving VV-ECMO

NARRATIVE REVIEW
HFJV in Neonatal and Pediatric Subjects

SYSTEMATIC REVIEWS
The Impact of Smoking on Maximal O₂ Uptake
Devices and Equipment for PEP With and Without Oscillation

EDITORIALS
Noninvasive Oxygenation for COVID-19
Resilience and Burnout in Respiratory Care
Prone Position for Mechanically Ventilated Subjects With ARDS
