

# Coming in November

## EDITOR'S CHOICE

Perspectives From COPD Subjects  
on LTOT Devices

## ORIGINAL RESEARCH

Biomarkers and Intraoperative Parameters  
in Post-Operative ARDS

Measurement of  $EA_{di}$  by Surface  
Electromyography in Intubated Subjects

Impact of Gas Masks on WOB,  
Breathing Patterns, and Gas Exchange  
in Healthy Subjects

Performance of Large Spacer vs Nebulizer  
T-Piece in Single Limb NIV

Effects of Fill Volume and Humidification  
on Aerosol Delivery During Single Limb NIV

Lung Sounds in the General Population:  
Standardized and Spontaneous Breathing

NIV as an Adjunct to an Exercise in Subjects  
With Moderate-to-Severe COPD

Airway Remodeling in Asthma:  
Evaluation Using High-Resolution CT

Nebulized Mannitol, Particle Distributions,  
and Cough in IPF

Using Fluid Balance to Identify Pulmonary  
Edema in Subjects With VAEs

## NARRATIVE REVIEW

Ultrasonography of the Mediastinum:  
Techniques, Current Practice,  
and Future Directions

## EDITORIALS

LTOT and Subject Perspectives

Why Not Prevent ARDS? The Role of Plasma  
Biomarkers in Surgery

Surface  $EA_{di}$  in Intubated Subjects

**RESPIRATORY  
CARE®**
