EDITOR'S CHOICE

Burnout Among RTs Amidst the
COVID-19 Pandemic

ORIGINAL RESEARCH

Expiratory Pause Maneuver to Assess Inspiratory
Muscle Pressure

Characteristics of Survivors of
COVID-19-Associated Pneumonia

Pulmonary Contusion Severity and Respiratory
Failure

Respiratory Mechanics and Inflammation in
COVID-19

HFJV in Infants With Congenital Heart Disease
IOS and Lung Ultrasound in COVID-19 Survivors
Ventilatory Ratio Threshold for Unassisted
Breathing

EELV During SBTs in Tracheostomized Subjects
Diaphragm Movement During Cough and
Extubation Outcome

Hygrometric Performances of Different HFNCs
Sleep Medicine Healthcare Worker Concerns
About COVID-19

New Respiratory Medications Reported in the
FDA's Adverse Event Reporting System

HFOV as a Rescue Strategy in Respiratory Failure
Student Characteristics, Class Times, and Academic
Performance in a Respiratory Care Program

SYSTEMATIC REVIEW

Epidemiology and Outcomes of ARDS Following
Pediatric Trauma

NARRATIVE REVIEW

Multidimensional Assessment and Interdisciplinary
Care to Reduce Asthma Readmissions

EDITORIALS

RT Burnout During COVID-19

Monitoring Spontaneous Effort During
Mechanical Ventilation

COVID-19 Survivor Respiratory Dysfunction
