

# Post-rotation Survey

## Note to Learners

We appreciate your participation in this novel clinical rotation. We know there are many challenges along the way. You have a unique and valuable perspective as the first cohort of eSRTs, and can help us identify our areas of improvement and growth. Your feedback will be entirely anonymous and will be used to assess and improve the curriculum. Some the aggregate survey results may be published in a manuscript describing the curriculum to help serve as a model for institutions seeking to deploy students in eICUs or seek to develop other telemedicine rotations. This will be valuable information for future students' experience should we continue to host RT students in the tele-ICU. Your participation is entirely voluntary.

Thank you!

UUID 4 random number (The number provided by your preceptor for initial survey)

---

This was an innovative clinical rotation (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

I was satisfied with the amount of training I received regarding telemedicine (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

Telemedicine will have a role in my future practice (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

Telemedicine will continue to have an important role in the delivery of respiratory care (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

I was appropriately oriented before and during my shift (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

The clinical rotation was well organized (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

Expectations and objectives for students were clearly defined (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

The workload was comparable to a regular ICU rotation (1 strongly disagree/100 strongly agree)

---

*(Place a mark on the scale above)*

The workload was appropriate for the clinical rotation  
(1 strongly disagree/100 strongly agree)

---

(Place a mark on the scale above)

I received useful, actionable feedback from my  
preceptor (1 strongly disagree/100 strongly agree)

---

(Place a mark on the scale above)

I am knowledgeable about telemedicine.

- Yes
- No

I was able to engage with patients at a level  
consistent with my abilities (1 strongly disagree/100  
strongly agree)

---

(Place a mark on the scale above)

I was able to engage with eRN and eMD at a level  
consistent with my ability (1 strongly disagree/100  
strongly agree)

---

(Place a mark on the scale above)

I was able to provide appropriate and effective  
respiratory care (1 strongly disagree/100 strongly  
agree)

---

(Place a mark on the scale above)

The rotation improved my ability to identify critical  
patients (1 strongly disagree/100 strongly agree)

---

(Place a mark on the scale above)

What I was asked to learn during this rotation was  
appropriate (1 strongly disagree/100 strongly agree)

---

(Place a mark on the scale above)

This rotation had a high educational impact

---

(Place a mark on the scale above)

I am confident in my ability to assessing mechanically  
ventilated patients (1 strongly disagree/100 strongly  
agree).

---

(Place a mark on the scale above)

I am confident in my ability to assess ventilator wave  
forms for asynchronies (1 strongly disagree/100  
strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to assess patients with acute respiratory distress syndrome (ARDS) (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to assess COVID-19 patients (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to navigate Excel Spreadsheets (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to assess patients on spontaneous breathing trials (SBT) (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to use ARDS protocols to manage patients with severe hypoxic respiratory failure (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to use protocols to assess patients and determine their plan of care (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

I am confident in my ability to communicate with an interdisciplinary care team confidently and effectively (1 strongly disagree/100 strongly agree).

---

(Place a mark on the scale above)

Describe your interaction with your eRT preceptor.

---

Describe your interaction with eRN.

---

Describe your interaction with eMD.

---

Describe your interaction with staff in the ICU.

---

---

How did this rotation differ from a typical clinical rotation?

---

---

What do you think it takes to make a competent eRT student?

---
