

HFNC PRE-EDUCATION SURVEY

Before completing the training today, please complete the questions below and on the back side of this page.

1. What is your age? _____

2. How many years have you been a nurse? _____

3. How many years have you been a nurse with this hospital? _____

4. What is your highest level of education? _____

5. What is your primary patient floor? _____

6. Are you familiar with high flow nasal cannula (HFNC) therapy? Yes No

7. Have you ever cared for a patient placed on HFNC? Yes No

7a. If Yes, how many years of experience do you have with HFNC? _____

8. How comfortable would you be caring for a patient who is receiving HFNC?

Very comfortable	Somewhat comfortable	Unsure	Somewhat uncomfortable	Very uncomfortable
---------------------	-------------------------	--------	---------------------------	-----------------------

9. How will the availability of HFNC on your floor make a difference in patient care?

It will dramatically improve patient care	It will somewhat improve patient care	Unsure	It will make patient care somewhat more difficult	It will make patient care much more difficult
--	--	--------	--	--

Please turn this sheet over and complete Page 2.

HFNC stands for **high flow nasal cannula therapy**. It is also referred to as AIRVO or Optiflow. HFNC has been used in the ICU at this hospital since 2012.

10. Do you think HFNC would be appropriate for a patient on your floor who is:

a. Hypoxic (increased oxygen needs)	Yes	No	Not Sure
b. Hypoventilating (i.e., rib fractures and pain, underlying cardiorespiratory disease)	Yes	No	Not Sure
c. Diagnosed with obstructive sleep apnea	Yes	No	Not Sure
d. Receiving procedural sedation	Yes	No	Not Sure
e. Fluid overloaded (i.e., CHF exacerbation)	Yes	No	Not Sure
f. Receiving palliative/comfort care	Yes	No	Not Sure
g. Short of breath / having increased work of breathing	Yes	No	Not Sure

11. Please indicate if you agree or disagree with the following statements.

a. HFNC is easier to set-up and use than CPAP.	Agree	Disagree	Not Sure
b. HFNC is more comfortable for the patient than CPAP.	Agree	Disagree	Not Sure
c. Patients requiring more than 4 L/min of Oxygen or with $\text{FiO}_2 \geq 50\%$ should be cared for in the ICU.	Agree	Disagree	Not Sure
d. A patient receiving HFNC should also have continuous monitoring.	Agree	Disagree	Not Sure
e. HFNC interferes with patient care, including physical therapy and mobility.	Agree	Disagree	Not Sure
f. HFNC is no different than existing therapies on the floor.	Agree	Disagree	Not Sure
g. HFNC would make it difficult for the patient to eat, drink, and sleep.	Agree	Disagree	Not Sure
