

Coming in November

EDITOR'S CHOICE

Respiratory Muscle Thickness in COVID-19

ORIGINAL RESEARCH

Predicting HFNC Outcomes Using the
ROX-HR Index

Pediatric Ventilation Liberation:
Bundled Extubation Readiness and Analgesedation

Continuous Albuterol Therapy in Pediatric Asthma

Intrinsic PEEP and Patient-Ventilator Trigger
Asynchrony

Caregiver Burden Is Associated With Physical Function
of Individuals on LTOT

Pediatric Mechanical Ventilation in Canada

Diaphragm EMG vs Ultrasonography in Predicting
Ventilator Liberation

HFNC in COVID-19: Predictive Response Factors

SHORT REPORTS

SARS-CoV-2 in a Southeastern Hospital System

High PEEP and Intrapulmonary Shunt Ratio in
SARS-CoV-2 ARDS

Assessing Decreased Thoracic Compliance With
FOT and Spirometry

SYSTEMATIC REVIEW

Effects of IMT and HIIT on Lung Function and
Respiratory Muscle Function in Asthma

NARRATIVE REVIEW

2021 Year in Review – Pediatric Mechanical Ventilation

NEW HORIZONS

Response to the Anticipated Ventilator Shortage During
COVID-19

EDITORIALS

Ultrasound Monitoring and Diaphragm-Protective
Ventilation

ROX-HR Index for Predicting HFNC Success
Ventilator Liberation in Pediatric Patients
