

# Coming in September

## EDITOR'S CHOICE

Ventilatory Ratio and Mortality in ARDS  
Patients With Prone Positioning

## ORIGINAL RESEARCH

Ventilatory Ratio as a Prognostic Indicator  
in ARDS

Extended Home Visit Program for  
Oxygen-Dependent COPD Patients

Respiratory Support in ED Patients With  
COVID-19 Respiratory Failure

Oxygenation and  $C_{RS}$  Associated With Pulmonary  
Contusion

Alveolar Ventilation-Targeted vs S/T Mode for  
Home NIV in ALS

NIV Prior to Intubation in Pediatric  
Hematopoietic Cell Transplant Recipients

A Bench Comparison of the Effect of HFNC  
Devices on WOB

One-Year Follow Up of NIV in General Wards  
Heated Wire Humidifier Hygrometric  
Performance

Arterial Cannulation Simulation Training in  
Novice Ultrasound Users

Nebulizer Cleaning Practices in People With CF  
When Traveling

## SHORT REPORTS

Awake Prone Positioning for Non-Intubated  
COVID-19 Subjects

Reduction of Breathing Frequency in COVID-19  
ARDS

## SYSTEMATIC REVIEW

HFNC vs NIV in Subjects With COVID-19

## AARC CLINICAL PRACTICE GUIDELINES

Capillary Blood Gas Sampling for Neonatal and  
Pediatric Patients

## EDITORIALS

Ventilatory Ratio, Deadspace, and Outcomes  
Revisiting Home Oxygen Therapy

Noninvasive Respiratory Support in COVID-19
